

Uday Singh Kushwah

Senior Backend Engineer | Domain: Backend & Distributed Systems

Email: candidate@example.com | Location: Remote

Professional Summary

Senior Backend Engineer with 7+ years of experience designing high-throughput microservices, API gateways, event-driven architectures, and database optimizations using Node.js, TypeScript, PostgreSQL, and MongoDB.

Core Technical Skills

- Languages & Runtimes: Node.js, TypeScript, Go, JavaScript (ESNext)
- Backend Frameworks: NestJS, Express.js, Fastify, GraphQL, REST APIs
- Databases & Caching: PostgreSQL, MongoDB, Redis, Elasticsearch
- Messaging & Queues: Kafka, RabbitMQ, BullMQ
- DevOps & Cloud: Docker, Kubernetes, AWS (ECS, Lambda, S3), CI/CD

Key Accomplishments

- Engineered scalable microservice infrastructure processing 10M+ daily events.
- Reduced API latency by 45% through query optimization & Redis caching strategies.
- Implemented robust OAuth2/JWT security and RBAC across multi-tenant applications.
